June 2022 - November 2022

PROJECTS

WORKFORCE

Handled Back-end modules and partial front-end using HTML, CSS, JS, C# (.NetCore 6), Entity Framework etc. This project was created to help bring the customers, contractors, managers and labors at one place in order to fulfill the requirements of the customers. The system handles Bidding/requirements/attendance and other things.

ONLINE EXAMINATION MART

Handled partial front-end and various back-end modules using HTML, CSS, JS, C# (.NetCore 6), MSSQL 2019 etc. This is a platform where collages can conduct exams online can create students result and set a reminder for students for their upcoming exams
